

Boat cabinet-maker m/f

Job and assignments

Boat cabinet-makers are passionate and creative. A boat cabinet-maker designs and customises the boat wooden furniture (wardroom, berths, storage units, wooden decoration, flooring...).

The boat cabinet-maker is an excellent craftsman/woman. He/she is astute and tasteful as he/she suggests ideas for perfect fittings and space maximization to meet the expectations of demanding customers. Boat cabinet-makers varnish and fit their fixtures. They may have to craft inlaid work.

Work environment

Boat cabinet-makers work in workshops for design and manufacturing. They also work on board -often on large boats- to fit and set the fixtures to the curved lines of the boat. Boat cabinet-makers mainly work on their own or in small teams, but they will also have to co-ordinate their actions with other trades onboard.

Inter-personal and expert skills

- You are creative and astute
- You are skilful and show dexterity
- You are hard-working
- You are careful of detail
- You are acquainted with the basics of electricity, sealing, insulation...
