

## Boat service technician m/f

Boat service technician m/f

### Job and assignments

The boat service technician is multi-tasking; he/she services and repairs pleasure boats. He/she has various skills in mechanics, deck equipment, electricity and plumbing. He/she orders spare parts, handles, assembles and dismantles, sets and controls the standing and running rigging. He/she makes sure that the boat is in good working order and ensures safety equipment compliance.

He/she repairs and maintains polyester hulls. As a source of proposals, he/she is the client's direct contact.

### Work environment

He/she is equally able to work at ship repair yards, for boat dealers or rentals and is essential to yachtsmen. He/she co-operates with the mechanics, electricians and painters at the shipyards.

### Inter-personal and expert skills

- You can read and understand scale drawings
- You are acquainted with the tools
- You are multitasking and able to prioritise your technical actions
- Your mind is set on quality, safety and deadlines
