

SUPPORT LOGISTICS

Logistics technical writer m/f

Job and assignments

Maintenance is essential to Ship building and repair. Logistics technical writers anticipate needs for spare parts and technical documentation for the ship and/or systems (propulsion/electrical circuits, HVAC, fluids...). They build up the database and write the operation and maintenance manual, as both are critical to sustain the ship or equipment.

Work environment

Logistics Technical Writers work hand in hand with all departments: document management, R&D, workshop, purchasing, warehouse. They also liaise with clients. Their duty involves regulatory constraints and standards.
