

Method agent m/f

Job and assignments

As the essential link between the engineering consulting department and the workshop, he/she factors in all parameters to optimize production: specification standards, quality, costs and deadlines. He/she takes part in the definition of technical files: manufacturing, assembly or repair.

Work environment

The method agent works in production workshops and aboard ships. He/she's the essential link between the other departments (production, purchase, sales...) and suppliers and sub-contractors.

Inter-personal and expert skills

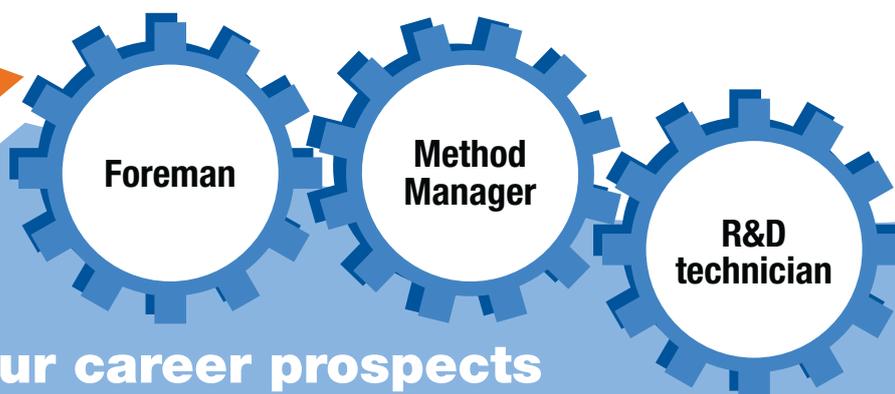

- You are skilled in computer aided design and project management tools, CAD and CAM
- You master job-related technical fields (mechanics, machines, boiler works, welding, electronics, electricity...)
- You have organisational skills
 - You have a sense of observation, analysis and synthesis
 - You have team spirit and inter-personal skills
 - Your technical English is fluent
